CAREER OBJECTIVE

Software Developer with over 3 years experience, Programming Instructor with 1 year experience with specific expertise in Ruby on Rails and HTML/CSS. Multimedia design and development student in Humber College seeking an opportunity to merge my technical skills with my passion for design. Highly skilled in teamwork, problem solving and establishing strong relationships with clients.

EXPERIENCE

LogicLogic,Inc, Tokyo, Jun 2016 - Present
Software Developer
- Worked in the fast-speed environment where I release a new function for our Ruby on Rails CMS for video on demand platform almost every month, such as timeline function, integration with third party CRMs, batch processing, form plugin, usage calculation, multi-tenant application and so on.
- On behalf of the company, I got the Widevine Certificate provided by Google in Singapore for our new Online Video Platform and shared the knowledge of DRM to my team members.
- Established the whole architecture for the live streaming and vod of 2018 FIFA World Cup of NHK. I set up the infrastructure on AWS, developing the CMS and RESTful APIs, and website.
- Had enough rehearsals through every possible way on every project after finishing the development.
- Mastered using and integrating third party platforms to our system, such as DRMtoday (KMS provided CastLabs) and AWS Elemental (platform for encoding, decoding and transcoding) first in my team.

Samurai Engineer School, Tokyo, Aug 2018 - Present
Programming Instructor
- Made an original curriculum, where I motivated and supported students to make their original web applications with Ruby on Rails to get a new job.
